6. A descriptive statement of the objectives from the new facility or modification including the expanding on the need for coverage and/or capacity requirements.
7. The physical and geographic location of the proposed project where each Commercial Wireless Telecommunication Facilities, Units, Wind Towers, Wind Generators, Cell Towers, substations, and any other units or structures will be located shall be included in a shape file.
8. A survey for each Commercial Wireless Telecommunication Facilities, Units, Wind Towers, Wind Generators, Cell Towers, substations, and any other units or structures will be located and other similar Facilities as identified in Curry County Ordinance #2019-05, which will include, at a minimum, the following:
 - a. tax map parcel number of each tract of property.
 - b. Size of the property stated both in square feet and lot line dimensions.
 - c. The location and proximity of each Unit or structure to any residents and all other structures and any and all residential structure(s) that are within 300 yards of each Unit.
 - d. The location, size and height of any and all existing structures on the property.
 - e. The location, size and height of all existing Unit(s) and all appurtenant structures on the property;

- f. The frequency, modulation and class of service of radio or other transmitting equipment;
 - g. The azimuth, size and center line height location of all existing and proposed antennae or proposed structure. Notification of any proposed changes in azimuth, five (5) business days prior to implementation.
 - h. The make, model and manufacturer of each Tower and/or Antennae.
 - i. A site plan describing the proposed Tower and Antennae and all related fixtures, structures, appurtenances and apparatus, including height above pre-existing grade, material, color, and lighting. The size of the Unit(s) is to be stated in both square feet and lot line dimensions, and a survey showing the location of all lot lines along with a footprint of the facility in Geographic Information System (GIS) Format (shaped file NM Plane West).
9. The type, locations and dimensions of all proposed and existing landscaping, and fencing on the property;
10. A description of each proposed Unit(s) and all related fixtures, structures, appurtenances and apparatus, including height above pre-existing grade, materials, color and lighting;
11. The actual intended transmission and the maximum effective radiated power of each Unit;
12. Direction of maximum lobes and associated radiation of each Unit;
13. A decommissioning plan outlining the process for the removal of any and all turbines, towers, units and other structures and property restoration plan before an Easement is returned to the land owner.
14. Power Purchase Agreement, or similar Agreement, for the sale of power generated from the facility, if any.
15. Evidence of a written transmission plan or other similar written Agreement for the project or for each Unit.
16. A Road Use Plan that outlines designed and built roads that will be used to transport equipment and workers to the site. This plan must include an assessment by an Engineer of the selected roads and a plan for improving and/or repairing any potential damage caused to roads by heavy machinery or equipment. A bond may also be required from the applicant to fix or to repair any damage that may occur.
17. Written Notices from any and all State or Federal agencies showing that the proposed project will not be a hazard to electronic communications, air traffic or create any RF Interference.

18. Documentation of Easement Agreements or WIC or associated facilities, if necessary.

This application must be filed with the Curry County Clerk's Office with a payment of a filing fee of \$250.00.
